i-Tree Design, Canopy, and Vue Training Workshop

Trees in our built environments can do more than just give us aesthetic beauty. Their canopy cover provides shade, water interception, pollution removal, and health benefits that are valuable to society. The value of these benefits can be estimated using the i-Tree suite of urban forestry analysis and benefits assessment tools. With results from these tools, advocacy for and management of our natural resources can be better justified.

Learn how to use several i-Tree tools from project design and development to generating reports and influencing policy. This workshop will demonstrate the steps necessary to set up your own project, collect and process your data, and generate reports. This workshop will also discuss how to use this information to influence policy and affect change.

International Society of Arboriculture (ISA) Continuing Education Units (CEU's) are currently being applied for.

Who should attend: Urban Foresters, natural resource managers, educators, extension specialists, non-profit groups related to natural resources

Date: Tuesday, December 17, 2013

Time: 9 a.m. – 4 p.m.

Location: Bartlett Tree Research Laboratories
13768 Hamilton Road
Charlotte, NC 28278

Registration: This event is free; however, we ask that you register by Tuesday, Dec. 10 as lunch will be provided. Because of space constraints, we will limit this workshop to the first 25 registrants. Please contact: Nick Martin at 704-961-2174 or email him at nmartin@bartlett.com.

Recommendations: This workshop is designed to allow the participants to work hands-on with the tools that will be discussed. Please bring a laptop pre-loaded with the i-Tree Vue application.
i-Tree Design, Canopy, and Vue Workshop Agenda

8:30 – 9:00  Check-in
9:00 – 10:00  i-Tree Tools overview, updates, and future directions
10:00 – 10:30  i-Tree Design uses, demonstration, and group exercise
10:30 – 10:45  Break
