# i-Tree model basics: data → tree benefits

## Key field variables

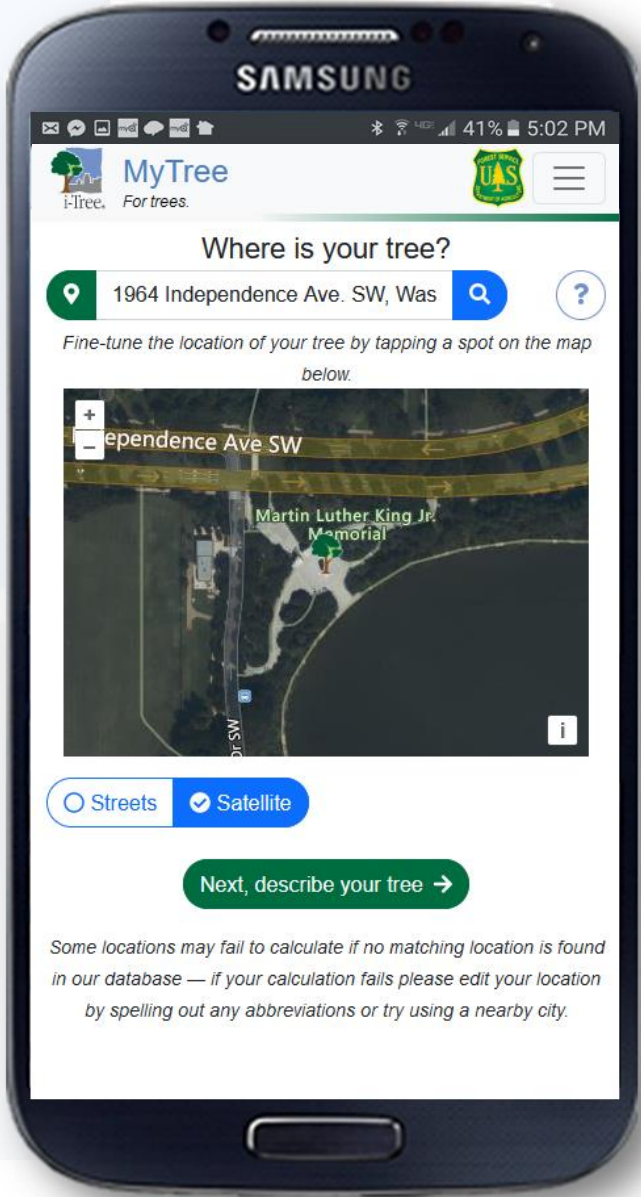

- DBH
- Species
- Crown measurements
- Tree health
- Building interactions
- Light availability

# Simple tools require simplifying assumptions

- Crown assumptions
- Less specific inputs
  - e.g. Health categories
- Fewer outputs
- Species list excludes shrubs
- Mortality assumptions

# Let's give MyTree a try

# MyTree: Common uses

- Education
- Engagement
- Connect people to the benefits of the trees around them

# MyTree: Strengths and limitations

## Strengths

- Simple to use
- Created for mobile devices
- Easy to grasp outputs
- Quick
- 20 year projection

## Limitations

- No ability to save projects
- Not great for more than 10 trees
- No internet = no MyTree

## Upcoming Features

- Mapping collected trees (in beta, [trilliontrees.itreetools.org](http://trilliontrees.itreetools.org))
- Support for group projects

# i-Tree Design: Common uses

- Connecting with property owners
- Engaging visuals
- Landscape planning
- Scenario evaluation

# i-Tree Design: Strengths and limitations

## Strengths

- Great visuals (maps, benefits web, graphs)
- Shareable report
- Interactive evaluation

## Limitations

- Limited to a handful of buildings and few dozen trees
- Helps to have a mouse for drawing

## Upcoming Features

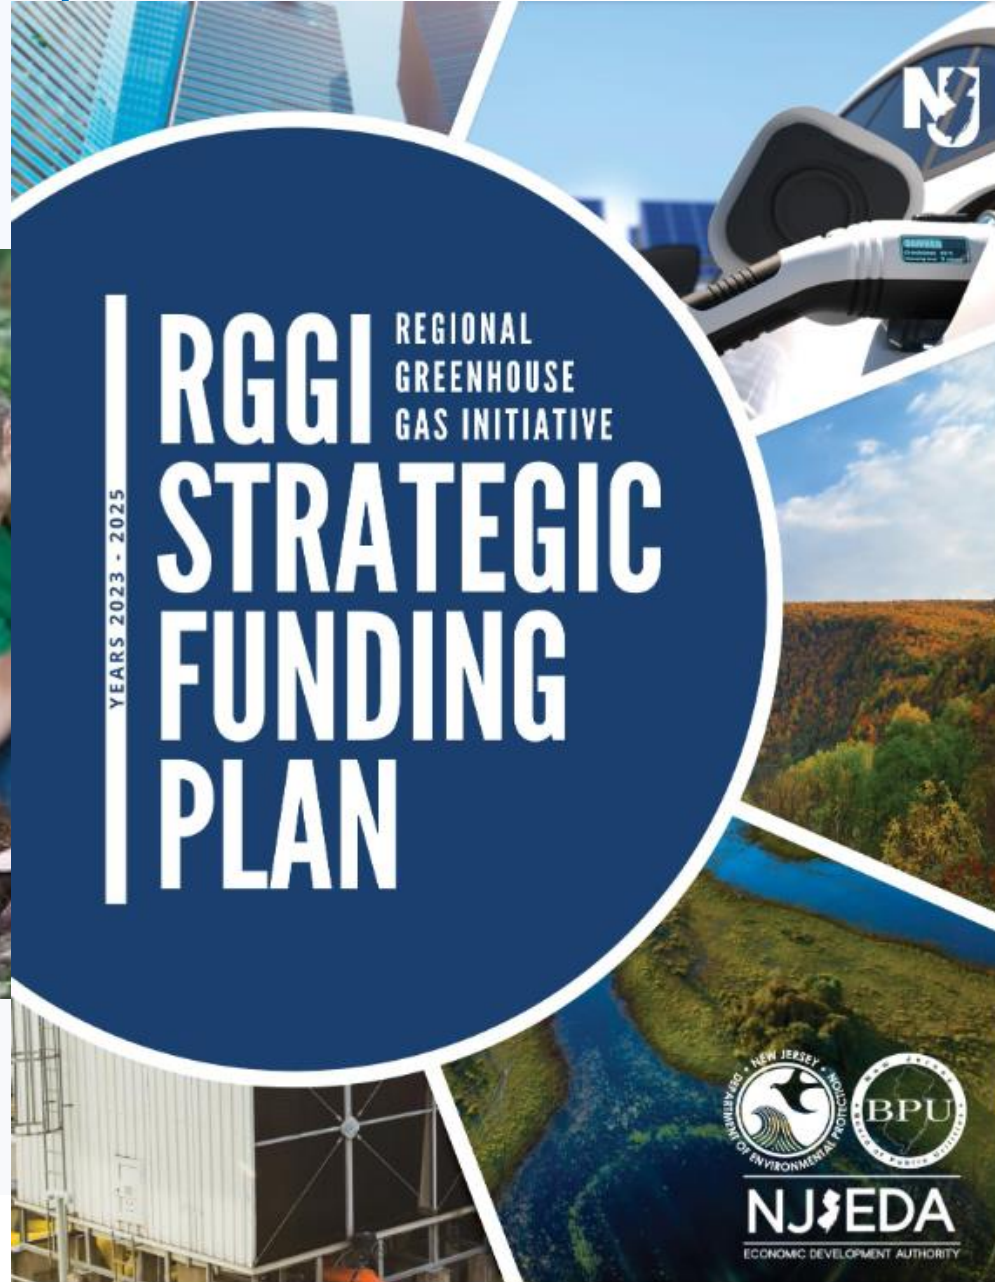

- Modernization
- Expanded capacity

# i-Tree Planting: Common uses

- Tracking planting projects
- LEED Certification of landscapes
- Carbon accounting
- Funding requests/reporting
- Sustainability impact reporting

# i-Tree Planting: Example Use

# i-Tree Planting: Strengths and limitations

## Strengths

- Easily project thousands of trees
- Flexible projection length
- Includes mortality
- Editable parameters

## Limitations

- Regionalized planting list
- Simplifies mortality schemes

## Upcoming Features

- Expanded results
- Benefits graph
- Annual results

# Flexible applications

- Compare species
- Evaluate the impact of maintenance (change condition or mortality)
- Estimate time to replacement for removed trees
- Evaluate policy decisions

We will be offering continuing education credits (CEUs) for both the International Society of Arboriculture (ISA) and the New Jersey state Urban and Community Forestry program. One CEU is available for each of the live sessions attended.

**How:**

All sessions will be streamed live via this [Microsoft Teams link](#). All sessions will be recorded and posted below as well as on the [i-Tree YouTube channel](#), so that you can catch up on anything you missed. There are no requirements for this course, and there will be self-directed exercises that you can use to gain experience using the tools. You are encouraged to submit any questions related to the course via [info@itreetools.org](mailto:info@itreetools.org), and there will be opportunities to ask questions during certain live sessions and office hours.

**When:**

Each session is one hour long and offered Wednesdays at 1:00 pm (Eastern US time). Note: Office hours days and times may vary.

- **August 2nd – Introduction to i-Tree.** Understand the basic science of i-Tree and the USFS research behind it. Explore the relationships between the i-Tree tools and the data they provide. Start to consider which i-Tree tools will be best for the application you have in mind.
