

Global i-Tree Science & Users Symposium: Discovering the Value of Your Forest

June 16 – 19, 2019
SUNY-ESF
Syracuse, NY

Please mark your calendars to attend the first global i-Tree Symposium held in the United States.

This event is intended to bring i-Tree users and developers together to help attendees:

-  Learn how to use i-Tree to create successful projects to improve urban forest management and enhance local human health and well-being
-  Discover how it has been successfully used globally
-  Learn new science related to ecosystem service assessments and i-Tree tools
-  Gather ideas on new projects
-  Advise on the future development of i-Tree tools
-  Interact with i-Tree staff and other i-Tree users

Day 1: Full-day of i-Tree training

Day 2: i-Tree science and application presentations

Day 3: Future of i-Tree – attendees will provide input as to where i-Tree should proceed to help meet the needs of a global forest management community in the future. In addition, attendees can meet with developers to discuss specific i-Tree projects or questions.

Registration is limited to 150 people due to hands-on training and will be open in January 2019.

For more information: <https://www.esf.edu/itree/>

Call for Abstracts is currently open for presentations and posters

Topic areas include:

-  Successful global applications of i-Tree
-  Advanced and novel i-Tree applications
-  Current i-Tree research projects
-  New field or ecosystem service quantification techniques
-  New directions in quantifying urban forest ecosystem services and benefits
-  Advances in urban forest planning and management

To submit abstract: [Abstract Submission Form](#)

Deadline for abstract submission is January 31, 2019.
